

CLINICAL EXAMINATION EQUIPMENT LIST

Equipment must be assembled in the testing area. It is impossible to utilize real people for these examinations, therefore it is requested that a “**dummy**” be provided. This could be a CPR mannequin (full body), a large doll, or other fabricated body. It has been found to be helpful to the student to be able to actually do each step of the procedure with as much equipment as possible. Facilities conducting courses are expected to have the listed equipment available.

Call light	Privacy curtain	Isolation bags for laundry & trash	Brush & comb
Paper towels	Bed with siderails	Isolation gowns	Shampoo
Soap	Linen: 2 Mattress Pads 2 sheets	Masks	Powder
Diet cards	Basin	Toothpaste	Toothbrush
